**Directions:** Read the paragraph and find the mistakes. Draw a line through each error in the paragraph. Then write the correction above it.

The Arctic is the coldest place on planet earth. It's around the North pole. It hardly ever rains there. Plants only grow there for two Months of the year. The temperature is below freezing (32° F) for twelve months of the year. Would you like to live in such a frigid location. I know i would not!
