

# Rounding ... The Call Me Maybe Version

We hear the ring of the bell  
Before the teachers can yell  
We try to act real swell  
Trying to get our way.

And just like that it's magic  
The teachers fell for our trick,  
Just a little logic,  
And now we got our way!

We're going bowling,  
Teachers are patrolling,  
We'll be rock n' rolling,  
But how many are going, baby?

Hey, all this adding,  
Just drives me crazy,  
So round those numbers  
For estimating.

The place value, please underline,  
Then look at one digit to the right,  
Five and above just give it a shove,  
Four and below, just let it go.

The numbers on the left,  
You already know.  
And the right ones  
Transform to zero!

We made a lotta pins fall,  
And we had quite a ball,  
But we have no clue at all  
Which team won the game.

It will be a close call,  
When we have added them all,  
But there is no time to stall,  
Or we'll be here all day.

All the teachers add,  
But they're kind of mad,  
Even as college grads,  
Oh, these numbers are so annoying.

Hey, all this adding  
Just drives me crazy  
So round those numbers  
For estimating.

The place value, please underline,  
Then look at the digit to the right  
Five and above just give it a shove,  
Four and below, just let it go!

The numbers on the left,  
you already know,  
and the right ones  
transform to zero!

Now this song is in my life,  
I can round quickly,  
"About" and "Approximately"  
Very quick quickly!

Now this song is in my life,  
I can round quickly,  
"About" and "Approximately"  
Very quick quickly!

The place value, please underline,  
Then look at the digit to the right  
Five and above just give it a shove,  
Four and below, just let it go!

The numbers on the left,  
you already know,  
and the right ones  
transform to zero!
